Portfolio: iksannurs.github.io/portofolio · GitHub: github.com/IksanNurs

SUMMARY

Frontend Developer with 4+ years of production experience, focused on Next.js, React, and TypeScript. Shipped server-rendered platforms serving 230,000+ registered users across education, e-commerce, and enterprise information systems. I own features end to end, from a Figma file through to a responsive, accessible, and fast interface. My full-stack background in Golang and Node.js means API integration and data modelling are never a blocker. I use Claude Code and Gemini daily as part of my development workflow, and have worked fully remote and asynchronously since 2022.

TECHNICAL SKILLS

Frontend: Next.js 14 (App Router, SSR/SSG/ISR, server & client components), React.js, Nuxt.js, Vue.js, TypeScript, JavaScript (ES6+), Redux Toolkit, React Hook Form, Zod

UI & Design: Tailwind CSS, MUI Joy, Framer Motion, Bootstrap, CSS3, responsive layout, design systems & theming (light/dark), Figma-to-code

Backend & Data: Golang, Node.js (NestJS, Express), REST APIs, OAuth 2.0, PostgreSQL, MySQL

Mobile: Flutter, React Native, Kotlin

Workflow: Git, AI-assisted development (Claude Code, Gemini), async remote collaboration, Agile

EXPERIENCE

Freelance Frontend & Full Stack Developer, Independent

Remote · February 2022 – Present

Clients include a national ed-tech company, Universitas Andalas, Institut Teknologi Padang, and local SMEs.

- Led frontend development for a suite of four exam-preparation products (healthcare competency exam, civil-service tryout, TOEFL, and live webinar) built with Nuxt.js and React.js, serving **233,000+ registered users**.
- Built the admin panel for the platform's clinical-assessment module on **Next.js 14 (App Router)**, using nested layouts, dynamic routes, and deliberate server/client component boundaries, with Redux Toolkit state persisted to cookies for SSR-safe hydration behind role-gated OAuth route guards.
- Designed a nested question-and-option form builder with schema-validated inputs (React Hook Form + Zod) on a custom MUI Joy theme layered with Tailwind CSS, supporting both light and dark mode.
- Designed and built the timed-exam interface, the platform's highest-traffic and most latency-sensitive surface, with real-time scoring, answer auto-save, and resilient state recovery on connection loss.
- Translated Figma designs into responsive marketing and product pages with close attention to typography, spacing, and motion, then extracted the recurring patterns into a reusable component library shared across five separate frontends.
- Integrated a centralized OAuth 2.0 single-sign-on flow across all client applications, unifying session handling and removing duplicated auth logic from each frontend.
- Built responsive web apps for SMEs with React.js on a Golang API, including a coffee-business COGS tool and a coworking-space booking site.
- Delivered university information systems for accounting, thesis submission, tuition-waiver requests, and asset management using Node.js, EJS, and Golang.
- Shipped cross-platform mobile apps: a photographer marketplace (Flutter + NestJS), homecare and webinar apps (Flutter, React Native), and rental and e-learning apps (Kotlin + Node.js).
- Use Claude Code and Gemini daily for scaffolding, refactoring, and first-pass code review, shortening delivery cycles while keeping every change reviewed before it ships.

Web Developer, FEB Universitas Dharma Andalas

Padang, Indonesia · August 2022 – December 2023

- Built and maintained web information systems for the Accounting and Master of Management departments, plus a faculty digital library (PHP, WordPress).
- Developed the Plantstore mobile application with Flutter.

Backend Engineering Independent Study Program, Ruangguru

Remote · February 2022 – July 2022

- Graduated with a final GPA of 4.00 / 4.00.
- Built REST APIs and an admin panel for the CAMP Forum app (Golang, SQLite) applying clean-code principles and design patterns, and contributed to its React.js frontend.

Full Stack Developer Intern, PT Lumigi Kode

Tangerang, Indonesia · September 2020 – December 2021

- Built an e-commerce platform with Laravel and its companion Flutter mobile client.
- Designed the PPID database schema in MySQL and built the accompanying digital library website in PHP.

EDUCATION

Bachelor's Degree in Management Information Systems, Asia Cyber University

Jakarta, Indonesia · Graduated March 2026 · GPA 3.92 / 4.00

Diploma (D3) in Information Technology, Politeknik Negeri Padang

Padang, Indonesia · September 2019 – August 2022 · GPA 3.92 / 4.00 (Cum Laude)

- Best Graduate of the Information Technology Department and Best Graduate of Politeknik Negeri Padang, 2022.

CERTIFICATIONS

- **Gemini Academy for Higher Education**, Google for Education (July 2026). Credential ID GGLM26071302
- **Scalable Web Service with Golang**, DTS Kominfo & Hacktiv8 (2022–2023)
- **Junior Web Developer (BNSP Certified)**, Digital Talent Scholarship (November 2021)
- **Build Advanced E-commerce Project A-Z (Laravel 8)**, July 2022
- **AWS Cloud Practitioner Essentials**, Amazon Web Services
